

Trial Support Trial Presentation Technology, Equipment Rental, and Support Services

Not all modern courtrooms in Washington State are equipped for electronic presentations, which is why it's important to be prepared. YOM: Full Service Court Reporting can provide your firm with all of the technology and hardware needed for presentation, including monitors, projectors, and screens. We also offer on-site support to help maintain and monitor the equipment.

Using effective technology during your trial is essential to presenting the best case possible. Not only does the technology need to be reliable, it also needs to be suited to your trial team. Our trial support team will collaborate with you to determine which equipment fits the needs of your case and ensure that the presentation system meets the court's specifications.
